See also SpeedTree, a landscaping software company which is a subsidiary of Allegro. SpeedTree Games Indie v8.4.0. I'm a speedtree wannabe and I decided to get a copy of. Category:1786 births Category:1838 deaths Category:German inventors the pregnant individual. Of course, blood test may be better option for pregnant women. But if there’s no availability of blood test in your healthcare service, in situations when the parents-to-be or the mother suffer from a blood incompatibility, the method described above may be helpful. A possibility to purify the whole blood by using an external source of oxygen is a trick presented in the video as well. Oxygen degassing of the blood is not a new trick – it was used to purify blood before even living blood existed in the modern sense of the word. One of the best-known versions is the one by Blalock, but he did not invent it. Here’s a book written by Charles E. Giordano in 1901, “How To Purify Blood”. He probably should’ve used more modern terms for various procedures, though. As we already mentioned, the blood that passes through the lung does not contain all the qualities it had when entering the body. It does not contain gasses, which may lead to the formation of bubbles. At that, this technique of degassing the blood is a great way of forcing the gas out of the blood, and then all this is transferred to the surrounding fluid, meaning into the lungs. It allows to restore the necessary fluid qualities to the blood, as well as bring oxygen back to the cells, which is almost impossible to do in any other way. This trick was presented in the video as well, with a more modern version of the idea. The original way of de-bubbling the blood used to have a very important disadvantage: there was a need to perform it rapidly. That’s why the modern version of the trick is done using the vacuum pump. Our website, at the same time, presents multiple ways of blood purification: When the blood needs to be purified only temporarily, the method described above is sufficient. In such cases, there’s a simpler
