Minimum:

OS: Windows 7, 8, 10

Processor: Intel Pentium 4 2Ghz

Memory: 512 MB RAM

English

the astral hero. the astral hero badge

Played through all of the content in 10 minutes. 5 different levels that all amount to the exact same swarm of differently skinned enemies. Press right or left with different weapons that all behave in identical ways. Watch as your different dudes all move

identically. This is a seriously poor effort. <https://youtu.be/LfgFg6OBEKQ>. Press right or left with different weapons that all behave in identical ways. Watch as your different dudes all move identically. This is a seriously poor effort. <https://youtu.be/LfgFg6OBEKQ>. This game is so simple yet good. Good to pass time. Also this game is very cheap. However there are few things that i confused and i like to talk about : 1. The purpose of jumping in this game. I felt that jumping make this game harder and you'll easily get damage from enemy. 2. 5 Different map with no different or unique features make this game feel boring after playing for 20 minutes nonstop. Need more variation of enemy skin not just the background type of traps, etc to be released asap. 3. Customizable Character or different character will be a good feature. Customizable character or Characters with a set of skills that only available to specific character. Maybe you can also add gift for achieving specific achievement. If you add the different character feature, you may make some character available through certain achievement. But hey, this game is just released, so i expect great feature to be released in the future. I rate 4.5/10. This game is so simple yet good. Good to pass time. Also this game is very cheap.
